

Philip's Stargazing 2014: Month-by-Month Guide to the Northern Night Sky

By Heather Couper, Nigel Henbest

Octopus Publishing Group, United Kingdom, 2013. Paperback. Book Condition: New. 231 x 163 mm. Language: English . Brand New Book. Philip's Stargazing 2014 is a concise guide to the northern night sky, helping starwatchers to see the year's most fascinating events! Whether observing with the naked eye, binoculars or a telescope, the guide is suitable for use between latitudes 40° N and 60° N, including Britain and Ireland, Europe as far south as Rome, and Canada and the northern USA as far south as Philadelphia. Each chapter (one for each month of the year) has a colour star map, created by Wil Tirion, showing the positions and phases of the Moon, the positions of the planets, and other useful information. Each month also includes a constellation described in detail; special events during the month, such as eclipses; a featured astronomical object, usually a deep-sky target; plus an astrophotograph, with details of how it was taken. The Solar System Almanac explains the movement of the planets, with particular attention paid to their positions in 2014. Solar and lunar eclipses, meteor showers and comets are also described. Exploring the Deep Sky provides a list of recommended deep-sky objects. The observer...

Reviews

It is one of the most popular publication. It really is written in easy words and not difficult to understand. You are going to like how the author wrote this book.

-- Prof. Evans Balistreri DDS

Completely essential go through book. This is for all who state there had not been a worthy of reading through. It is extremely difficult to leave it before concluding, once you begin to read the book.

-- Lydia Legros
