Brand New Book \*\*\*\*\* Print on Demand \*\*\*\*\*.Excerpt from Incidental Problems in Gas-Producer Test, Vol. 31 As part of its investigation of methods of increasing the efficiency of fuel resources, the Bureau of Mines is continuing the study of the general problems involved in the economic use of fuels in gas producers that were carried on by the technologic branch of the United States Geological Survey. In the course of this study many incidental problems of prime importance have demanded consideration. Among them is the determination, under practically constant conditions, of the duration of gas-producer tests necessary to reduce the possible error to a minimum. A discussion of this proper length of test period forms the first part of this bulletin. An attempt to dispel some of the uncertainties that arise in an investigation or to account for some of the minor phenomena often necessitates a systematic and careful study of certain chemical, thermodynamic, or physical laws, or a combination of these, which in turn may result in information or conclusions of great value. Furthermore, seemingly unimportant observations often prove to bear directly upon...
