

Truth and Illusion

By Anil Kumar Sinha

Peacock/ Atlantic Publishers & Distributors (P) Ltd., 2010.
Softcover. Book Condition: New. Creation of universe has been an enigma since time immemorial. Matter is made of energy. $E=mc^2$ is an established scientific fact. Energy, in essence, is an expression of natural forces. Natural forces recognised so far are electromagnetic force, a strong force binding the nuclear particles, weak force of radioactivity, force of gravitation and a recently recognised force binding together the quarks. It has been suggested that all these forces are essentially part of a unified field force of nature. Forces exhibit as field, as wave and sometimes as particle radiation. To explain their behaviour exactly various theories, e.g. quantum theory, relativity theory and string theory have been postulated in physics. But their changing behaviour is complicated enough to be understood fully by any one theory. They all are debated, discussed, modified, challenged, cancelled and formulated, again and again to reach new syntheses. ?Consciousness? appears to be one variant of this field force of nature. Space, time and the unified field force of nature interacted to create this universe. Consciousness incorporated into matter and the living world happened. Life, in essence, is conscious awareness of self and an intense desire...

Reviews

This book is definitely not straightforward to get started on studying but extremely exciting to read. It is really simplistic but shocks in the 50 percent of the ebook. Once you begin to read the book, it is extremely difficult to leave it before concluding.

-- **Ally Reichel**

This publication is amazing. It is definitely basic but shocks in the fifty percent of your publication. You won't feel monotony at anytime of your own time (that's what catalogues are for concerning if you question me).
