If a person were ever face-to-face with a huge, hungry animal with sharp teeth, they probably wouldn't care exactly what that animal was! But from a safe location, can we tell whether it was a crocodile or alligator that wanted to take a bite? By examining their jaw structure, teeth, and other physical features, we can easily tell these two animals apart! Graphic organizers and amazing images highlight each Animal's habitat and other small differences between the two fearsome creatures, showing readers just what creature is lurking below the waters.
