

# Projective Differential Geometry of Curves and Ruled Surfaces

Filesize: 7.79 MB

## ***Reviews***

*Merely no words and phrases to describe. I really could comprehend almost everything using this created e pdf. Your daily life period will be change once you full reading this ebook.

## PROJECTIVE DIFFERENTIAL GEOMETRY OF CURVES AND RULED SURFACES

To download **Projective Differential Geometry of Curves and Ruled Surfaces** eBook, make sure you access the web link under and save the document or gain access to other information which might be relevant to PROJECTIVE DIFFERENTIAL GEOMETRY OF CURVES AND RULED SURFACES book.

Rarebooksclub.com, United States, 2013. Paperback. Book Condition: New. 246 x 189 mm. Language: English . Brand New Book \*\*\*\*\* Print on Demand \*\*\*\*\*.This historic book may have numerous typos and missing text. Purchasers can usually download a free scanned copy of the original book (without typos) from the publisher. Not indexed. Not illustrated. 1906 edition. Excerpt: .proportional to them. We shall then find an equation of the form  $i, (utvk-ukv, ) = 0$ , also of the wth degree. By the same reasoning as above, we find that the lines of a complex of the nih degree, which are situated in a given plane, envelop a curve of the nth class, the complex curve of the plane considered. The locus of all lines which satisfy two independent equations, homogeneous in the line coordinates, consists of oo2 straight lines. It is known as a congruence. Clearly the lines common to two complexes form a congruence. But a congruence need not be the complete intersection of two complexes, just as a space curve need not be the complete intersection of two surfaces. The essential part of our definition of a congruence is that it contains oo2 straight lines. The locus of oo1 straight lines is a ruled surface, which may or may not be the complete intersection of three complexes. We shall have occasion to make use of the expression of the homogeneous line-coordinates in terms of non-homogeneous pointcoordinates. For this purpose we need merely put  $V_1 = x, V_2 = y, V_3 = z, V_4 = 1, t = af, zt = tf, zs = z s_4-1$ , so that  $co_{12} = xy_1--x y, ra_{13} = xz --afz, nu = x--x_1$ , In particular the two points  $x, y, z$  and  $a?, y_1, \#$  may be infinitesimally close to each other, so that  $x_1 =...$
