BUILDING MECHANICS (GENERAL HIGHER EDUCATION TEACHING SECOND FIVE)

To download **Building mechanics (general higher education teaching second Five)** eBook, you should access the hyperlink listed below and save the ebook or have access to additional information that are highly relevant to BUILDING MECHANICS (GENERAL HIGHER EDUCATION TEACHING SECOND FIVE) book.

paperback. Book Condition: New. Ship out in 2 business day, And Fast shipping, Free Tracking number will be provided after the shipment. Pages Number: 300 Publisher: China Power Pub. Date :2011-08-01 version 1. Liangli Jie editor of the building mechanics for the general higher education second five planning materials. The book is divided into sixteen chapters. the main contents include basic knowledge of mechanics. mechanics calculations based on axial tension and compression. shear and compression. the geometric properties of plane figures. torsion. plane bending. combined deformation. strut stable plane system geometric composition analysis. force analysis of statically determinate structure. the impact of statically determinate beam line. statically determinate structure of the displacement calculation. force method. displacement method. moment distribution method. Book from the mechanical theory of systematic and coherent starting to theoretical mechanics. mechanics of materials and structural mechanics through three mechanical knowledge of organic. merged into one. forming a new system of building mechanics. After each chapter with exercises and answers. Building mechanics' institutions of higher learning as a general civil engineering. project management. environmental engineering. water supply and drainage. urban planning. surveying. security. materials in architecture. engineering and technical personnel are also available for reference. Contents: Preface Introduction Section II structure and rigid components. deformation of the solid rod and its basic assumptions Section IV the basic form of the deformation mechanics of building content and V load classification task mechanics basic knowledge of the first chapter a basic concept of mechanics. the basic axiom of statics Section IV Section constraint problem by trying to think about mechanics calculations based chapter exercises power in the plane section at right angles to the projection axis torque and couple II III fourth plane force system synthesis plane force system V space force balance exercises exercises refer to the answer thinking questions...
